MATERNO TWIST

MANUAL BREAST PUMP WITH TWISTABLE HEAD

A manual breast pump to help the mother in all those situations where it is not possible to breast-feed the baby. The ergonomic blower mimics the suckling of a newborn favouring the release of milk in a natural way. The anatomical silicone cup elements massage in a circular motion to stimulate the production and flow of milk.

- Rotating handle for a more comfortable use.
- 2 phase suction: imitates the natural breastfeeding of the baby.
- 1st phase: fast and shallow suction to stimulate,
- 2nd phase : slow and deep suction to encourage a greater flow of milk output.
- Soft padded cup with 6 massaging and stimulating petals.
- Model # 1215M

3-PHASE ELECTRIC BREAST PUMP

The Materno Life 3-phase electric breast pump is a valid aid in all situations, and it is suitable for daily use both in and outside the house.

Designed to imitate the baby’s suction rhythm, it is equipped with a 3-phase technology with 9 levels of intensity:

- 1st phase with 4 levels of automatic massage and stimulation.
- 2nd phase with 5 customizable extraction levels. The suction is delicate and imitates the 2 natural phases of suction of the newborn: initially fast and shallow suction to stimulate; subsequently slow and deep to encourage a greater flow of milk output.
- 3rd “anti-stasis” phase selectable on request to facilitate the emptying of the breast to prevent Galactostasis and breast engorgements.

1 Mimic® anti-colic baby bottle is included which facilitates the alternation between breast and baby bottle without interrupting the baby’s habit to breastfeeding, thanks to the special teat that imitates the maternal nipple for shape, elasticity and movement.

BREAST PADS

DAY AND NIGHT BREAST PADS

- Natural cotton layer in contact with the skin.
 - Comfortable and invisible with adhesive strips for a perfect fit.
 - Seamless design.
 - Super slim beehive 3D structure.
 - Special super absorbent SAP material
- The disposable breast pads for day and night offer effective protection from breast milk leakage during breastfeeding. Their particular 3D slim structure offers super-absorbent power in just 1 mm of thickness; in fact, the beehive surface does not allow liquids to pass from one cell to another; thus, increasing the absorbency in every centimeter. Extremely thin, they are ideal to wear all day even with tight-fitting clothes and are safe for the night. They keep the nipple area always dry and prevent irritation. They are soft and comfortable and with a delicate thin layer of cotton on the surface that makes them suitable for even the most sensitive skin. Individually packaged for maximum hygiene, comfortable to use at home and on the go.

GEL BREAST PADS

THERMAL GEL BREAST PADS

- Thermal gel breast pads, which can be either warmed up or cooled down to offer relief for soreness of the breasts. The gel pads can be warmed by just placing it in a bowl of warm water for a few minutes or cooled by simply placing in the fridge for an hour. They provide instant safe and natural relief from engorgement, easing and soothing tenderness. The gel pads are re-usable and do not interfere with breast feeding.
- Warm use: stimulates milk flow before feeding.
- Cold and extra-cold use: soothed sore or engorged breasts. Re-usable.

NIPPLE PROTECTORS

NIPPLE PROTECTORS

- Protects sore, irritated or injured nipples and are usable even with small, flat or inverted nipples. The special shape allows for skin-to-skin contact with baby during breastfeeding.
- Made of odourless, tasteless ultra-fine silicone.

MELLYPLUS

UV steriliser

Portable UV sterilizer for pacifiers, teats and baby bottles. Furthermore, MellyPlus is small, light and needs only 3 minutes to effectively sterilize. Also, very comfortable to carry in a bag or backpack.

How to Use

The MellyPlus uses combined action of ozone and UV rays to eliminate 99,9% of germs and bacteria. Very easy to use – simply open the upper part and insert pacifier or teat in dedicated support and close. Secondly, the sterilization process will begin and also end automatically after the UV lamp turns off. Also, teats and bottles can be sterilized without taking them off from the bottle. Finally, simply remove the back part of MellyPlus and place the sterilizer on the teat. You can use it with all the most common pacifiers as well as teats and wide neck bottles available on the market.

Features

- Sterilizes in 3 minutes
 - Works with 2 AAA batteries
 - Suitable for pacifiers, baby bottles and teats (also without removing them from the bottle)
 - Portable
 - Suitable for wide neck bottles
-

TRAVELMILK FLEXI CAR BOTTLE WARMER

- Travelmilk Flexi is a fantastic solution to heat up milk or food when you are not at home. Once the food or the bottle is warmed up, the thermic case will retain the heat, keeping the temperature stable thanks to the properties of Neoprene fabric. It is easy to clasp to the baby carrier thanks to the practical hook.

How to use

- Small, practical and foldable car bottle warmer with 12V power supply. Bottle is made using neoprene with heating element of carbon fiber.
- The front zip allows the use of any bottle up to 300 ml, as well as other containers up to that size. When the cable is detached, the bottle warmer becomes a thermic insulating pouch for its content, also doubles as protection against possible hits. The practical lateral hook allows the product to be hanged on baby carrier or backpack.

Features

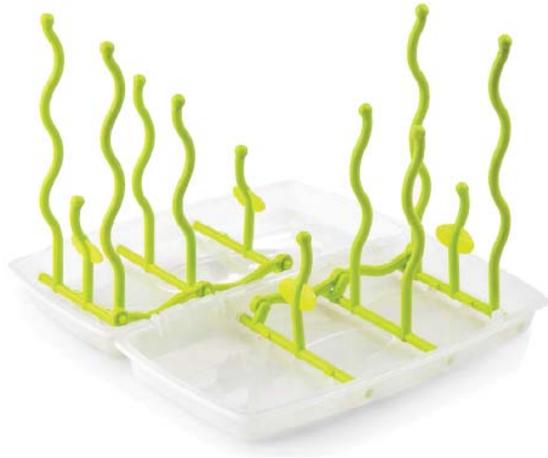

- Wide neck, Suitable for any bottle up to 300ml
- Outer fabric: Neoprene, Inner material: Heating element of carbon fiber
- Hit resistant, thermic fabric
- Detachable cable
- Power supply 12V, Power 14 W

- Model #: 1074

BOTTLE RACK

FOLDABLE BOTTLE RACK

- For drying bottles, cups, pacifiers, and breastfeeding accessories after washing.

How to use

- The foldable bottle rack can dry up to 8 bottles, cups, pacifiers, and breastfeeding accessories after washing. The excess water will drip on the internal tray without spilling on other surfaces. When not in use, it can be folded, while remaining clean and hygienic. It does not requires much space as it only measures 24x12x4cm.

Features

- Minimal amount of space
- Portable
- Foldable

- Model #: 1481

BRUSH

BOTTLE BRUSH

- Indispensable for effective cleaning of all baby bottles as well as plastic and glass containers, with nylon bristles that avoid scratching surfaces. Removable mini-brush from the bottom of the handle for cleaning the inside of teats.
- Dishwasher washable
- Model #: 1486

AIR.55 COOL!

PACIFIERS

- The suckling reflex is already present in the fetus during pregnancy. After birth, baby looks for the breast to feed and comfort to fall asleep. Pacifier offer calming and relaxing effect for the baby. Many specialists recommend the use, especially during sleep to reduce the risk of SIDS. Responsible use of pacifiers is positive for growth and psychophysical development. Also, promotes more harmonious mouth development.
- Design for normal mouth development with **orthodontic silicone teat**. The pacifier's plate is 55% air. Its light, breathable grill allows for almost total aeration of the area around the mouth, avoiding the pooling of saliva, which can irritate the skin. Its permeability also facilitates baby's breathing. Protective pacifier cap to keep the pacifier clean and to sterilize in the microwave by simply adding water.
- Design for normal mouth development with **symmetrical silicone teat**. The pacifier's plate is 55% air. Its light, breathable grill allows for almost total aeration of the area around the mouth, avoiding the pooling of saliva, which can irritate the skin. Its permeability also facilitates baby's breathing. Protective pacifier cap to keep the pacifier clean and to sterilize in the microwave by simply adding water.

PRIMI PESI

DIGITAL BABY SCALE | PRIMI PESI®

- Digital scale with high precision division in 5 gr. Ideal in precisely controlling weight of the baby during the first phase of growth. Useful during the first months of baby's life when it is important to know the precise amount of milk consumed by the newborn during breast-feeding.
- Features
 - Max weight 18kg
 - 5gr division
 - Meter to measure height
 - Tare mode
 - Double-weight mode
 - Weight-block mode
 - Back-light LCD screen

ARIASANA 2

ULTRASONIC HUMIDIFIER AND IONIZER WITH COLD STEAM AND SILVER ION TECHNOLOGY

- The new Ariasana2 is equipped with a ceramic filter which is one of the best water filtering systems thanks to its natural properties.
- The ceramic filter allows a longer life of the product as the ceramic surface can be cleaned and washed several times in order to prolong the life of the product itself.
- Greater hygiene: ceramics is a bacteriostatic material that inhibits microbiological growth, eliminating the need to sterilize the filter element even when the product is not used for a long time.
- Easy cleaning: one of the important features of the ceramic filter is the ease to which it can be cleaned.
- Product styling: new color and design of the external case finishing for a fresh and modern appeal and aesthetics.

SONIC CLEAN & CARE

ELECTRIC TOOTHBRUSH FOR BABIES AND KIDS

- Sonic Clean&Care is the innovative baby and kid electric toothbrush specifically designed and developed for children from 3 months to 5 years old to help parents to teach their child the important habit of brushing their teeth daily.
- Sonic Technology
- 3 modes: Sensitive 16000 vibrations per min (gentle on tooth enamel and sensitive gums of babies);
- Deep cleaning 22000 vibrations per min (suitable for kids when their eating habits are more similar to adults);
- Pulsating 22000 vibrations per min (effectively removes dental plaque)
- Interchangeable brush heads in different shapes, materials and sizes to suit all needs: Standard Small, Standard Medium
- Soft Nylon DuPont® bristles
- Timed LED light for 2 mins
- Ergonomic shape for easy grip for parents and children
- 100% waterproof
- Child-safe battery compartment closure (1xAAA)

TEETHER

TEETHER

- Gum massager in soft rubber suitable for the initial teething period.
- The large massaging surface with its 3D texture relieves and gently stimulates inflamed gums.
- Its elongated shape also allows the gums above the molars to be massaged.
- The ring offers another surface with an irregular texture making it satisfying to bite on.

- Durable, safe, and hypoallergenic.

BATH THERMOMETER

BABY BATH THERMOMETER

- Measures the temperature of bath water in a simple and safe manner. The graceful seahorse floats on the water and allows easy reading of the detected temperature. Suitable for those who prefer a traditional thermometer that does not require periodic replacement of batteries.

BATH AND ROOM THERMOMETER

DIGITAL BATH AND ROOM THERMOMETER

- Digital thermometer with large LCD display to quickly check the water temperature for the bath and the temperature of the bedroom.
- For the bath, it floats on the water instantly measuring the temperature and showing it on the display.
- If the value exceeds 38°C, the LED light turns red to indicate that the water is too hot; if it is lower than 35 °C the light will turn blue to indicate that the water is too cold.
- The thermometer is certified according to the European standard EN71 to be used also as a “safe toy” to entertain the baby; out of the water
- it is a convenient thermometer to monitor the bedroom temperature.
- The analysis of the competitors shows that there are few known brands that offer bathroom & bedroom solutions and that are also certified as toys, in particular we mention Avent, which in terms of price positioning, however, is higher than Nuvita thermometers.
- Regarding the design and visual stimulation component of the child, there are several “playful” solutions on the market, which however do not have all the characteristics of Nuvita 1006 and 1007 thermometers; detection of water and room temperature, fast and easy readability, perfect floatation, auto shut off and certified use as a toy. For this reason those products can’t be compared.

PAPPASANA VAPOR COMBO

FOOD STEAMER, BLENDER AND BOTTLE WARMER, “6 IN 1”

- 6 in 1 mini food processor, baby bottle warmer and sterilizer. It steams, chops, mixes and homogenizes. Defrosts and warms up baby bottles and jars. Steam sterilizes all baby's accessories. It is possible to carry out each operation individually or select the "Blend & Cook" mode that will automatically blend and mix the food after cooking it, creating a healthy and tasty dish for your baby.
- Ceramic water tank: To heat or defrost baby bottles evenly
- Timer up to 30 minutes
- Backlit LCD display for easy reading of the functions
- The particular shape of the steel blades homogenizes the ingredients without forming air bubbles, an important precaution to avoid colic
- "Blend & Cook" function to save time: the only thing you need to do is to pour the ingredients in to get a healthy, tasty and creamy dish for your baby in just few minutes
- Steam sterilizes
- Warms and defrosts breast milk in a bain-marie to preserve its nutritive principles

• FEATURES

- Hook to hang baby unit anywhere
- Belt clip on parent unit
- 2.4Ghz, 32-channel digital transmission baby monitor with one-way communication
- Activated automatically as soon as a noise of the baby's voice is detected – SmartVOX function with sensitivity adjustment to save energy
- Compact, light and easy to use
- Powered both by power adaptor or 3 AAA batteries per unit (total of 6 batteries).

CORNER GUARDS

CORNER GUARDS

- Corner guards by Nuvita are suitable for any surface and will help protecting the baby from any dangerously angled surface.
- These Corner guards by Nuvita will eliminate the dangers caused by angled surfaces making the home safer for the baby.
- Soft, non-toxic and the bright colour visually reminds the baby of a “danger zone”.
- Also, suitable for any surface, thanks to the practical double-sided tape that will not damage the furniture.

CABINET LOCKS

CABINET LOCKS

- Wardrobes, kitchen cabinets, and bathroom cabinets for a child are all full of interesting things. Don't forget to secure them with Nuvita Cabinet Locks. Family's little one will have to find other games and explore other places of the house.
- Cabinet lock with safety self adhesive latch. Useful for securing furniture by blocking doors. Suitable for closets, cabinets, drawers and doors in general.
- Self-adhesive
- Safety lock

DOOR FINGER GUARDS

DOOR FINGER GUARDS

- Often doors close suddenly and unexpectedly. For that reason you must prevent that with Nuvita door finger guard. Easy to put on or take off. Also, very easy to spot among the things at home thanks to bright colour.
- Door stop by Nuvita will keep your doors from closing suddenly and thus keeping the baby from getting hurt. It is suitable for the majority of door types and windows. It will be enough to place the stopper out of the baby's reach.
- Material: EVA
- Suitable for all thicknesses
- Works without stickers

SOCKET COVERS

ELECTRICAL OUTLET COVER PLUG COVER

- Apart from the circuit breaker, the plug covers are a safety must whenever babies are involved.
- Babies can put their fingers or metal objects inside plugs thus possibly touching the electrical parts.
- Plug covers by Nuvita are safe: once they have been applied on plugs, they can be taken out only with the special key included in the box.
- Extra safe as the cover can only be removed from the plus using the supplied key.
- May be used with all 2-pin outlets (Italian/European/Schuko).

DRAWER GUARDS

DRAWER GUARD

- Prevents the baby from opening cabinet doors and drawers.
- Keeps baby from danger of crushing his fingers.
- Also, very easy to install.
